Description

In Task #1561, we allowed the doc_ids which have the same sim_score as the self-link. However, we now want the scores of such links/similar doc_ids to be reduced by 0.05 if all the words of the KP lie within the 20K CW. The changes will have to be made in the update_doc_id_score_list function from tagging_utils.py.

We will review the KPs affected by this change and check if we need to create any other exceptions.

Test the changes with Whirlwind Book and C-API book.
