| <p>There are cases of KPs which are getting removed (most prominently in Library Reference) due to recent changes. It includes a variety of KPs like "one-shot (de)compression", "lexical analysis", "optional or positional arguments", etc. We need to make appropriate changes to make sure that these KPs are not discarded as they are important.</p> <p>Possible routes of investigation</p> <ol style="list-style-type: none"><li>1) Check generate_candidates function and make tweaks in the list of POS tags</li><li>2) Modify the current filters in generate_candidates to make sure these KPs pass through. Change the if condition: "if cand_ph<sup>0</sup> == variation<sup>0</sup>" to "cand_ph<sup>0</sup> in variation"</li></ol> |                 |                        |               |
