RK-A - Bug #1743

Task # 1726 (Resolved): Handling cases of bad header variants like "representation"

Checking singular and plural forms of the tmp_var from variations_in_common_section_words in common words list

10/13/2021 06:53 AM - Nandini Bansal

Description

An experimentation approach to further extend this task. Earlier we were only checking the tmp_var in the 4K CW list. We should now check for singular and plural forms of the tmp_var in the 4K CW list as well to increase the coverage area and discard as many bad header variants as possible.
Based on the list of the header variants we get, we should do the following:
1. Verify the standalone KPs generated by these header variants and check the context of the KPs

Subtasks:

Bug # 1744: Calculating the fullness_ratio of the header variants to decide a threshold...	**Resolved**
