**Description**

For some cases, the word count of KPs and header variant is the same but they have uncommon middle words which make them poor matches. They should not be linked to each other as most generally, they refer to two very different concepts.

Increase the penalty to 0.5 for these cases.

1) write .pyc files | writing compressed files
2) more precise control | more drawing control
3) python program file | python source files
4) write .zip files | write wav files
