RK-A - Bug #1765

Updating the P of tagged KPs where subKP and mainKP are separated by symbols

Description

It was noticed that for single word subKPs and mainKPs separated by symbols, there were some discrepancies in the way Ps were being appended to the BR2 tag.

For e.g.

```
os.path.basename(sys.argv[0]) BR2PPPPPPPPPPPPP 421 ^&* os.path.basename ^&* 1.0 1993 ^&* sys.argv
^&* 0.95 722 ^&* 0.833
```

Here only "os.path.basename" was getting tagged while the list of similar docs included documents for "sys.argv" as well. So we need to update the P's added as per the subKP founded and their similar docs being added to the similar_doc_id string.
