Category:		Estimated time:	2.50 hours
Target version:	P1	Spent time:	0.00 hour

Description

The repeating KPs within 50 words should be skipped as per the new scheme:

If multiple instances of the same KP are tagged within the threshold (50 words) like k1, k2, k3 (same order)

Case 1) if $sk1 < sk2 < sk3$, only k3 will be tagged

Case 2) if $sk1 < sk2 = sk3$, both k2 & k3 will be tagged

Case 3) if $sk1 > sk2 \geq sk3$, only k1 will be tagged

Case 4) if $sk1 < sk2 \geq sk3$, only k2 will be tagged

Note: $skn = \text{sim_score of } kn$

The case where sim_scores will be the same for all KPs will be handled in a different ticket. Changes to be done in "check_repetition_multi_occurrence" function
