#### Description

On the BR2 line in the annotated file, please add the floor( $((\text{totalOccurrenceCountOfKP}/\text{totalOccurrenceCountOfAllKPs}) * 100)$ ,0) as the first value after "BR2".

Before example:

```
data-intensive BR2 120 ^&* 0.904 115 ^&* 0.904  
science, IR2P
```

After example:

```
data-intensive BR2 5 120 ^&* 0.904 115 ^&* 0.904  
science, IR2P
```

where 5 is the added value. you may have noticed that it is actually 5%. however, there is no need to add the % symbol and increase the size of the file and more importantly storage on the server.

Motivation for this ticket: We are planning to point users to some purple links and invite them to click. Ideally, we dont want to point them to very obvious ones like 'object' or 'module'.
