| <p>Today, we show the closed extension under some conditions.</p> <p>In the closed state, under the arrow and at the top of the purple area, add a X button. Clicking on this should stop showing the extension. If the user reloads this page, it is fine to show. Let the colour of X be bold black.</p> <p>In the open state, show the X in the rightmost part of the white band (basically to the right of the phrase 'Video Hyperlinker').</p> <p>As always, do not use cookies or browser storage.</p> <p>Whenever the user does this, a searchable line should be recorded in the server logs.</p> <p>Of course, if user goes to other videos/pages, show as per current rules.</p> <p><b>Logging Extension API request body structure:</b></p> <pre>{   "videoIdData": {     "youtube.com": {       "hideExtensionClickCount": 1,       "videoSupported": true/false     }   } }</pre> |             |                        |            |
