Description			
On some sites, we may want our copilot to show up only on a subset of pages. In order to accomplish this, please enable support for: In 1.txt, there could be a new copilot_urls line after "aliases" line. example: #%&copilot_urls:["https://scikit-learn.org/stable/modules/classes", "https://scikit-learn.org/stable/modules/generated", "scikit-learn.org/*blog*"]#%& If this is present, do not show copilot on https://scikit-learn.org except for urls with the above two prefixes. More examples: we should show copilot for the following URLs: - http://scikit-learn.org/modulesblog/1/2/3 - https://scikit-learn.org/1/2/3/4blog5
