<https://edutestdev-240612.appspot.com/document/lifestyle-zestpast50.com-pl-2024-01-22-233316.755101-spl?documentURL=11235/prd/reference.html> is the TOC page

Shahzar says that for this request parameter sent to the server as documentUrl=11235/prd/fat-Good-fats-&-bad-fats-26.html. And two different request parameter is seperated using the seperator &. So backend server is getting only documentUrl=11235/prd/fat-Good-fats- and while this document is not found then it is trying to find the closest match in which it is trying to access the index which is going out of bond for this lurl causing exception in the backend. Hence, no data is being sent to the FE creating the issue.
