Target version:		Spent time:	0.00 hour
Description			
Change call_openai_api to the following where allowed_origins is populated by runtime config			
def call_openai_api(request): # ... (your existing POST request and prompt handling logic) ...			
<pre>origin = request.headers.get('Origin')</pre>			
1. Check if origin is in the allowed origins list if origin in allowed_origins:			
1. Call the helper function result = generate_text(prompt) # ... (rest of the logic for successful requests)			
1. Create the response headers dictionary (allow the specific origin) headers = { 'Access-Control-Allow-Origin': origin, # Use the specific origin here 'Access-Control-Allow-Methods': 'POST',
