Target version:			**Spent time:**	0.00 hour

Description

If config.js has "Personal" set to true, and it is not a Youtube page, when user highlights content, show two options 'Store in KB' and 'Copy'. If user chooses to store in KB, store the highlighted content in yyyymmhhmmss.txt in GCS bucket <env>-scraped-content, where <env> is "edutestdev", "edutestqa" or "prod" in the following format:

URL: <url>
Content: <highlighted content>

PS: You could reuse the code from our earlier RHS Pilot's 'Explain'/'Copy' logic.
