Target version:		Spent time:	0.00 hour

Description

Today, we allow user to type in something and we provide the OpenAI assistant's response. But, when user chooses a grade and subject, we should first ask the question Q.

If user's answer matches A, then say "Answer is correct". Otherwise, ask assistant for the answer and provide that to the user.

For this ticket, use Q as "What is the capital of France?" and A as "Paris".

As always, test in testMode as true as much as possible.
