Description			
<p>We actually want to provide user a choice of simultaneously selecting multiple themes. This will help us mix up questions with different themes. So, we will actually not go with 3631.</p> <p>So, in the place where we provide a dropdown, place a button "Choose Your Themes". One should be able to choose and change at any time. Clicking on this should move control to a place below the chat interface where there are multiple bubbles.</p> <p>-Each bubble is a "theme text" (like "Star Wars" or "Cricket") inside an oval. Users can click it.</p> <p>-Clicking it toggles the theme on or off. [Other actions based on this will be added to another ticket]</p>
