Description

Sample file: test book, v2.txt

-If you find a pattern like "[cite: <comma separated numbers>]" (e.g. "[cite: 459, 605]"), please remove.
-Although question numbers are sequential in the file, be ready for (a) question numbers missing (b) repeating question numbers. Process all questions.
-Since the file can be huge, read 10 questions or less at a time and process instead of reading in all the questions from the file and processing. This change must be made in both Colabs.
