Description

If no line exists, assume that there are no supported themes.

Please do not calculate chapter num data from the chapter_list because we dont want to depend upon 'set_chapter_names_list' gcf to change the number of chapters shown.

instead, when a question is added, update the number of chapters if necessary.

although we dont need to add questions for out of order chapters (such as adding questions for chapter 5 first, and then chapter 1 and then chapter 8), in order to reduce assumptions and checking code in the FE, please store the distinct chapter numbers in DS and add a new chapter number to this list if needed.
