Description

As we refactor code, and add more features, we will need to save questions, answers and related data into DS.

However, we do not want to make AI related calls. In such cases, it is useful to read all necessary information from DS and save it back to DS.

In "3772 colab", add a way to do this. So, we will not need standard.txt input. Other inputs will most likely be needed. One additional input could be chapter number.
