

## RK-A2 - Feature #3809

### Update given Google sheet with the list of questions that have thumbs down greater than X

03/10/2025 10:49 AM - Ram Kordale

<b>Status:</b>	New	<b>Start date:</b>	03/10/2025
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.40 hour
<b>Target version:</b>		<b>Spent time:</b>	0.00 hour
<b>Description</b>			
Google sheet to be used: <a href="https://docs.google.com/spreadsheets/d/1F5aDBK0G1wCZjxbegE0909rr3sgbsHD_LepQlgRCzEA/edit?gid=0#gid=0">https://docs.google.com/spreadsheets/d/1F5aDBK0G1wCZjxbegE0909rr3sgbsHD_LepQlgRCzEA/edit?gid=0#gid=0</a>			
Input would come from a file containing zero or more of: server=dev qa prod board=<board> grade=<grade> subject=<subject> threshold=X			
If the input file does not exist or is empty or does not have some key value pairs, assume all matching values. For example, if the input file does not exist, then the query would be all boards, grades and subjects. Also, if threshold is not available, assume X is 0.			
Google sheet would contain zero or more entries with the following columns: board, grade, subject, style, chapter, exercise_number.			
Sample code:			
<pre>!pip install --upgrade gspread google-auth import gspread from google.colab import auth from google.auth import default  1. Authenticate and create the PyDrive client. auth.authenticate_user() creds, _ = default() gc = gspread.authorize(creds)  1. Replace 'Your Spreadsheet Name' with the actual name of your Google Sheet spreadsheet = gc.open('Your Spreadsheet Name')  1. Select the first sheet worksheet = spreadsheet.sheet1  rows = worksheet.get_all_values()  #do processing  1. Example: Update a specific cell worksheet.update_acell('A1', 'Updated Value')  1. Example: Append a new row new_row = ['Value1', 'Value2', 'Value3'] worksheet.append_row(new_row)</pre>
