Description			
<p>Sometimes, explanation steps are aware of the option choices. For example, it could say "option (a) which is blah 1 cannot be correct because of the issue bleh 1...". So, we cannot afford to randomize the option choices on the FE side.</p> <p>Going forward, we will be saving the shuffled other_choices data (Including the answer choice) in the DS while processing in the Colab. FE needs to be updated to handle this accordingly.</p>
